Dear Patron,

More than four decades from now, we qualified as one of the most proven caterers to the Medical Profession at large for meeting up their needs for Quality Surgical Instruments, Hospital Equipment's and Medical Appliances and that too at the prices competitive enough to suit everyone's pocket. Moreover, we too believe as you do that while picking up such supplies Quality should be the only criteria for a best surgeon to be the BEST.

For the last few years, as we all are aware of, the prices of the raw material and other costs have increased manifold and moreover are never stable and even the import restrictions and frequent changes therein leave us helpless in printing out our regular price-lists and that too for such a vast variety of products. Therefore, we suggest you to always send as your detailed enquiry for goods required by you.

We hereby take the opportunity to provide you with CHECK LIST- the firsthand purchase guide for any Doctor/Surgeon/Laboratory/Hospital or Stores etc. to help you in preparing your immediate requirement list enabling us to quote for your requirement EXACTLY.

May we have the liberty to request you to please check-up at your end whether our name is existing in the regular "Suppliers / Contractors List" with your purchase department / personnel? Please take trouble to see that all your enquiries are being sent to us regularly.

We look forward to the pleasure of having a chance for serving you and if possible, to your best satisfaction. A trial solicited.

Thanking you,
Yours Sincerely,
SIGMA INTERNATIONAL
Sales Department

PURCHASING GUIDE CHECK LIST

This check list has been made to give you an idea of many articles available to furnish a modern Clinic, Hospital, Nursing Home, Laboratory and/or a Research Institute etc. and assist you and your purchase department for preparing your order. You will be happy to determine the items which will fill your up requirement. You can add a few more, if not mentioned in this list and can ask for the prices, if necessary, before placing the orders.

FORCEPS	SCISSORS
